

Performance Test Report - Feb 28, 2026 (#19)

Open in Postman

Postman collection: concurrency test
Report exported on: Feb 28, 2026, 20:07:54 (GMT)

Test setup

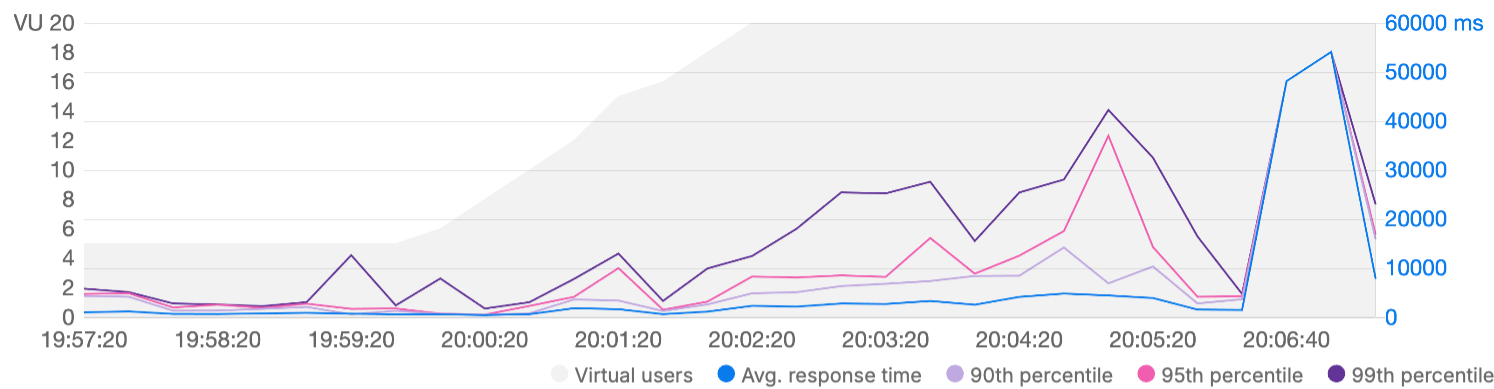

Virtual users 20 VU	Start time Feb 28, 19:57:20 (GMT)	Load profile Ramp up (2 minutes 30 seconds)
Duration 10 minutes	End time Feb 28, 20:07:26 (GMT)	Environment -

1. Summary

Total requests sent 2,502	Throughput 4.13 requests/second	Average response time 1,991 ms	Error rate 0.96 %
------------------------------	------------------------------------	-----------------------------------	----------------------

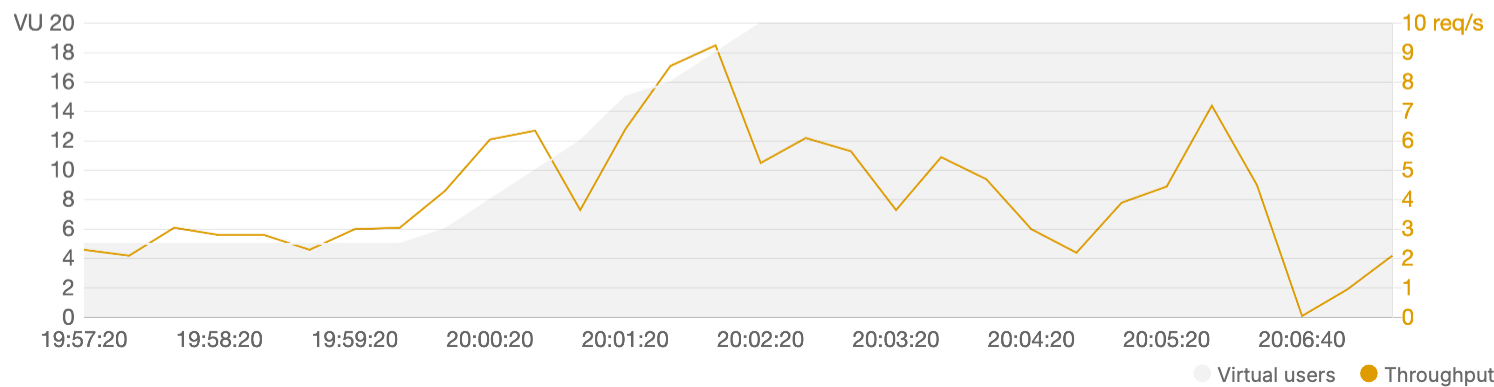

1.1 Response time

Response time trends during the test duration.

1.2 Throughput

Rate of requests sent per second during the test duration.

1.3 Requests with slowest response times

Top 5 slowest requests based on their average response times.

Request	Resp. time (Avg ms)	90th (ms)	95th (ms)	99th (ms)	Min (ms)	Max (ms)
GET Get data http://localhost:8081/api/v1/posts	1,991	4,182	7,582	17,627	384	54,185

1.4 Requests with most errors

Top 5 requests with the most errors, along with the most frequently occurring errors for each request.

Request	Total error count	Error 1	Error 2	Other errors
GET Get data http://localhost:8081/api/v1/posts	24	ESOCKETTIMED OUT (24)	-	0

2. Metrics for each request

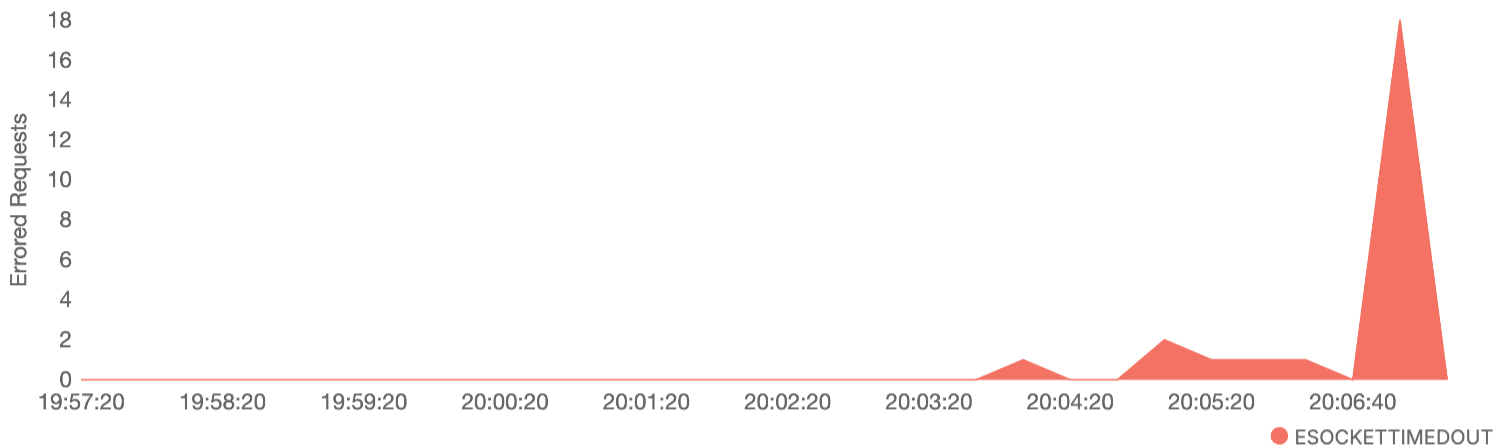

The requests are shown in the order they were sent by virtual users.

Request	Total requests	Requests/s	Min (ms)	Avg (ms)	90th (ms)	Max (ms)	Error %
GET Get data http://localhost:8081/api/v1/posts	2,502	4.13	384	1,991	4,182	54,185	0.96

3. Errors

3.1 Error distribution over time

Top 5 error classes observed during the test duration.

3.2 Error distribution for requests

Errored requests grouped by error class, along with the error count for each class.

Error class	Total counts
ESOCKETTIMEDOUT	24
GET Get data	24

Testing API performance on Postman

Postman enables you to simulate user traffic and observe how your API behaves under load. It also helps you identify any issues or bottlenecks that affect performance.
